DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 5, 8-12, 14, 21, and 22, drawn to apparatuses having an injection device inside a vessel, for classes/subclasses see below.
 - II. Claims 4, 13, 15-20, and 23, drawn to methods of mixing fluids, for classes/subclasses see below.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the methods of Invention II can be practiced on an apparatus that is materially different from that of Invention I. For example, the methods of Invention II can be practiced on an apparatus that includes a chamber with bottom orifices and wherein the tubes or conduits are positioned adjacent the chamber rather than traversing the chamber.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant elects Group I, applicant must additionally elect the following:

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

la. Claims 1-3, 5, 8-12, 14, and 21, drawn to an apparatus that includes an embodiment wherein the vessel is a distillation column, classified in class 202, subclass 81+.

lb. Claims 1, 3, 5, 8-12, and 22, drawn to an apparatus that includes an embodiment wherein the vessel is a reactor, classified in class 422, subclass 194.

If applicant elects Group II, applicant must additionally elect the following:

Ila. Claims 4, 15-20, and 23, drawn to a method of mixing fluids in a vessel, classified in class 203, subclass 39+.

Ilb. Claims 4, 13, 15-20, and 23, drawn to a method of mixing fluids in a reaction vessel, classified in class 48, subclass 197R.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 15 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Kevin P. Kerns whose telephone number is (571) 272-1178. The examiner can normally be reached on Monday-Friday from 8:00am-5:00pm.
